

Contents

Executive Summary..... 13

Part 1: Background to the Broadband Industry

Overview..... 25

Market adoption of broadband..... 27

Four end-game scenarios 31

Fibre and next-generation access: the missing business model..... 36

Video: killer app, or network-killer?..... 40

Mobile broadband: Hype & realism 41

Convergence of fixed / mobile broadband..... 44

Evolving regulation: help or hindrance?..... 45

Government & 'National Broadband'..... 48

Broadband in the developing world 53

The vendor landscape..... 57

Part 2: Fixed retail broadband business models

Introduction..... 61

Retail broadband end-game options 63

Cable vs ADSL vs Fibre – same models, or fundamentally different? 65

Capping and tiering 65

Application-specific caps and tiers 67

Specific zero-rated / unmetered sites & services..... 68

Video providers: the power-brokers?..... 69

Triple-play / IPTV..... 70

Incremental services 73

Cross-network Internet services 74

Prepay fixed broadband..... 75

Fibre 76

Future value-add services? Smart grids, telemedicine and ‘The Cloud’ 79

The impact of local-loop unbundling and structural separation 81

Conclusions: Fixed retail models 82

Part 3: Mobile Broadband Retail Business Models

Overview 86

Mobile broadband computing 90

Smartphone business models 105

M2M broadband business models 115

Do revenues reflect costs?..... 116

Wholesale mobile broadband and MVNOs 120

Enablers and technologies 122

Conclusion & recommendations 126

Part 4: Advanced broadband wholesale business models

Overview 129

Bulk broadband wholesale models 134

Creating next-gen wholesale 143

Telco-Telco wholesale 2.0..... 150

Broadband capacity ‘slice and dice’ 154

Marketing & selling wholesale 177

Conclusions 181

Part 5: Use Case: Managed Offload of Mobile Broadband

Industry background	185
Use Case Overview.....	192
Benefits and Commercials.....	196
Implementing the Use Case.....	202

Part 6: Forecasts and Conclusions

Overview	210
Market forecasting methodology	211
Broadband access market	216
Revisiting the end game scenarios	238

Table of Exhibits

Figure 1: Global broadband access lines, 2000-2020 28

Figure 2: Global broadband access lines by technology, 2005-10 29

Figure 3: Global fixed broadband by region, mid-2009 30

Figure 4: Global broadband traffic 31

Figure 5: Potential end-game scenarios for BSPs 32

Figure 6: Ultra-fast broadband availability in developed markets..... 37

Figure 7: In much of Europe, the premium for high-speed broadband is low 38

Figure 8: Next-generation broadband will need new revenue sources 39

Figure 9: Video will dominate broadband traffic 40

Figure 10: Global mobile broadband computing users..... 41

Figure 11: Only about 60% of HSPA connections are used actively 43

Figure 12: Does Net Neutrality only apply to ‘pure’ Internet access? 47

Figure 13: State involvement in telecoms goes beyond the regulator: U.K. example. 49

Figure 14: Governments embrace non-Telco NGA build-out models: U.K. example.. 50

Figure 15: Examples of government broadband-related stimulus plans 51

Figure 16: How uptake of broadband impacts GDP 56

Figure 17: Global fixed broadband lines 61

Figure 18: Wholesale within global fixed broadband, 2010..... 63

Figure 19: Retail fixed broadband end-games becoming polarised 64

Figure 20: Structure of the online video industry 69

Figure 21: The Global Online Video Market (\$Billions) 71

Figure 22: IPTV will not be the major distribution type in future 72

Figure 23: Case study: In France, Iliad (Free) bundles many features into a single broadband package 74

Figure 24: European fibre penetration forecast 2013..... 77

Figure 25: FTTH architectures – PON and P2P 79

Figure 26: Future services may be delivered via Telco retail or wholesale broadband, or over the public Internet 80

Figure 27: Mobile broadband active user base 86

Figure 28: Global 3G data traffic by device type, mid-2009 88

Figure 29: The (mobile) broadband incentive problem – no money!..... 89

Figure 30: Global mobile broadband computing users..... 90

Figure 31: Evolution of external 3G modems & dongles 92

Figure 32: Vodafone UK mobile broadband pricing trends 93

Figure 33: The pros and cons of embedded notebooks for users..... 95

Figure 34: The pros and cons of embedded notebooks for MNOs 99

Figure 35: Examples of MIDs 102

Figure 36: New retail models & devices for mobile broadband 105

Figure 37: Mobile broadband on handsets is different to the PC 107

Figure 38: SoftBank Japan handset data plans 108

Figure 39: Selected top-tier smartphones, end-2009 110

Figure 40: Will AppStores help Telcos’ business models?..... 112

Figure 41: Mobile ‘hotspots’ like the Novatel MiFi enabled shared-MBB services.... 115

Figure 42: Traffic volumes for mobile broadband vs. revenues 117

Figure 43: MBB supports both subscription & transient models..... 127

Figure 44: Active vs. Passive wholesale 130

Figure 45: Ontology of Telco wholesale and VAS offerings 132

Figure 46: Fixed and mobile broadband wholesale revenues..... 133

Figure 47: Broadband wholesale segmentation 134

Figure 48: The Economics of Local Loop Unbundling..... 138

Figure 49: LLU vs Bitstream Wholesale impact..... 138

Figure 50: Many regulators see wholesale as key to NGA success 140

Figure 51: No single wholesale model is optimal 141

Figure 52: Ofcom’s views on Ethernet access 142

Figure 53: IP packet structure 144

Figure 54: Potential two-sided wholesale business models (distribution platform) ... 157

Figure 55: Connected TVs will drive most Internet data traffic..... 159

Figure 56: Embedded devices suitable for ‘comes with data’ plans..... 161

Figure 57: mBlox’s logo for its Sender Pays Service 163

Figure 58: Global mobile broadband computing subscribers 166

Figure 59: Content players paying to boost download speeds..... 169

Figure 60: The number of viable operators varies by region 180

Figure 61: Forecast broadband wholesale revenues by category 181

Figure 62: The expense of mobile broadband delivery is high..... 187

Figure 63: Offloading mobile broadband to WiFi or Femtocells 188

Figure 64: Unmanaged offload – benefits and risks..... 190

Figure 65: Determining where offload is required will vary by Telco 192

Figure 66: Forms of managed offload from fixed/cable operators 195

Figure 67: Ericsson’s cost-breakdown for mobile broadband 199

Figure 68: Varying levels of sophistication for offload 207

Figure 69: One- and two-sided revenue models for broadband..... 212

Figure 70: Telco 2.0’s Distribution marketplace 215

Figure 71: Global retail broadband subscribers 2005-2020 218

Figure 72: Global average retail charges for broadband 2005-2020 219

Figure 73: Broadband Retail Market Value 2005-2020 220

Figure 74: Percentage of broadband lines supplied via bulk wholesale 2005-2020 . 222

Figure 75: Average global wholesale prices 2005-2020 223

Figure 76: Global bulk wholesale access market 2005-2020..... 224

Figure 77: Global slice-and-dice revenues per line 2005-2020..... 227

Figure 78: Global slice-and-dice incremental wholesale access revenues 2005-2020
..... 228

Figure 79: Global active users of broadband without a subscription 2005-2010 229

Figure 80: Active broadband users including ‘comes with data’ 231

Figure 81: Global non-subscription upstream revenues per user per year 2005-2020
..... 231

Figure 82: Global ‘comes with data’ broadband access 2005-2020 232

Figure 83: More cells needed for future mobile broadband capacity 233

Figure 84: Global wholesale revenues 2005-2020..... 236

Figure 85: Global broadband access market 2005-2020 236

Figure 86: Breakdown of global wholesale revenues 2005-2020 237

Figure 87: Potential end-game scenarios for BSPs 239

Figure 88: Which is the most likely scenario for Telcos in Western Europe in 5 years?
..... 240

Figure 89: Will cloud computing app providers pay Telcos for guaranteed QoS? 242

Figure 90: How successful will the current focus on consumer apps and app stores be
for operators? 247
